

# White Paper: Omega Investigations Are Making a Fortune Online!

For the past 10 years, I've been a property landlord but as you probably know there's an interest rate rise looming on the horizon and that's going to wreak havoc with my income as rents don't go in line with interest rate rises.

Because of that, I started a new company that helps people with their internet marketing and we just opened up a new office that helps businesses like you get more income from the internet.

I was doing some research online because I needed to find someone and during that research I found out that there are a lot of businesses out there paying well over £6 per click for their adverts on Google.

If you're doing that, my new office can help you get those clicks for free!

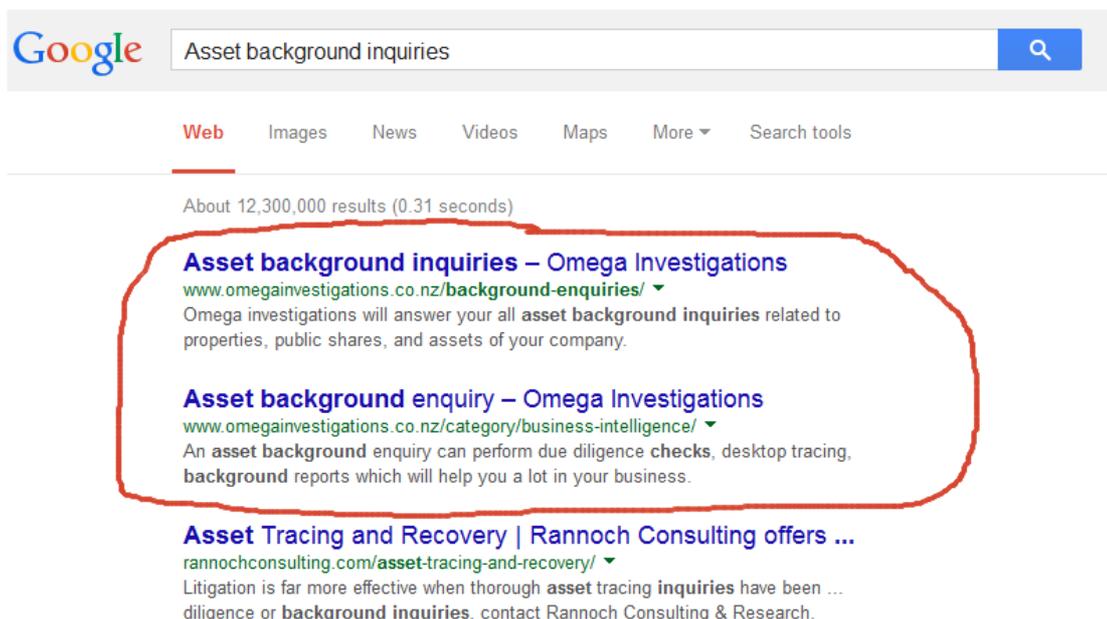

If you're getting 100 visits a month from your adverts, that's £600 a month just for someone to click through to your website.

That's crazy as I can help you get all that traffic for free.

It won't take long for me to get your website high up in Google and when that happens you can cancel AdWords and not have to pay Google another penny.

All of those clicks and leads are free when you're working with me.

Look at what we've done for Omega Investigations:

The image shows a screenshot of a Google search for "Asset background inquiries". The search bar at the top contains the text "Asset background inquiries" and a search button. Below the search bar, there are navigation tabs for "Web", "Images", "News", "Videos", "Maps", "More", and "Search tools". The search results are displayed below, showing "About 12,300,000 results (0.31 seconds)". Three search results are visible, with the first two highlighted by a red hand-drawn circle:

**We get you onto the  
first page of Google or  
you pay nothing!**

We're a search engine optimisation company with a difference.

We focus on revenue.

Anyone can promise you lots of visitors to your site - we could do that tomorrow - but that's no good to you unless they buy things from you.

We're the only company that I know of that doesn't just focus on search engines but keeps their eye on your revenue all the time.

We're here to increase your bottom line profits and if we don't do that, we shouldn't be doing business together and you should fire us. It's that simple. The only goal we've got is to make sure you make more money for your business.

We're going to work with one business per industry in your town - that's the only way we work.

I don't know what you're thinking as you're reading this but if you want to give me a call (my name's Trevor and the best number is 07967 478272) then you might be the one that gets to work with me.

And, at the risk of repeating myself, I want to tell you again that I am going to work with one business per industry in your town.

And you've already seen the proof that I can do this.

I'm going to work with one - and one only - business from your industry in your town. So you should call me right now on 07967 478272 if you want to be the one.

If you don't want it to be you, no worries, I'll keep contacting every other local businesses close by until someone says "yes".

I know from past experience that someone will call me and that they'll be the ones showing up in the search results and getting the business.

They'll be the only person I'll be working with in your town from your industry.

That could be you if you call me on 07967 478272.

So if you'd like me to help you get you lots more business from the internet, call me.

It's as simple as that!
